- 5 The Congress finds that—
- 6 (1) the National Science Foundation has long 7 been a government leader in strengthening our Na-8 tion's information infrastructure;
  - (2) as automation and digitization reach the healthcare industry, that industry will need to draw heavily on the expertise of researchers funded by the National Science Foundation for the collection, processing, and utilization of information;
    - (3) the National Science Foundation's basic research, demonstrations, and curriculum development assistance are all required to help make sure the industry has the knowledge, procedures, and workforce necessary to take full advantage of advanced communications and information technology;
    - (4) the Bureau of Labor Statistics estimated that 136,000 Americans were employed in 2000 as information management professionals in the healthcare industry alone, with projected growth of 49 percent by 2010; and
- (5) no systematic plan exists for designing and
   implementing systems and information tools and for
